

San Francisco, California, May 15

Hypersoft joins Gartner ITXPO, the technology's most strategic conference.

Hypersoft Information Systems (<http://www.hypersoft.com>) the leading provider of complete metrics for the analysis of business and IT service management announced today the availability of the update of the latest version of OmniAnalyser™ 9.0.

OmniAnalyser™ is used by the world's largest organizations for: Regulatory Compliance, IT and Corporate Governance, Service Level Agreement management, Billing and Charge back, and to streamline IT and Business Operations.

"OmniAnalyser™ 9.0.1 builds upon the strength of our 9.x platform by expanding the depth and breadth of the services which we natively support. IT service providers will find significant improvements in our support of directory and perimeter services as well as more flexible web application reporting." says Serguei F. Dobrinevski, Director and CEO of Hypersoft.

Large commercial customers are benefiting from the time saving features found in OmniAnalyser™. Mr. Jerome E. Merlau, with First Horizon National Corporation's Enterprise Messaging Solutions group says, *"We use OmniAnalyser daily, to save resources. It also saves me time ... it eliminates the need to go server to server, information store to information store, it saves me a half a day each week."* OmniAnalyser's flexible and expanded web reports are a great benefit too. *"The time that OmniAnalyser saves me in delivering the reports is awesome. We bought Hypersoft's product because it does the things that Microsoft doesn't do."*, says Mr. Merlau.

OmniAnalyser™9.0.1 now has got more great features such as:

- *Extended Active Directory reporting: Service Dashboard, Replication Analysis, Total Replication, and Report on User Logons by a User or User groups, and Average Number of Concurrent Users.*
- *New design of Web Reports*
- *New publishing formats of OmniAnalyser™ output data*
- *64 bit platform supporting*
- *Topology Reporting for Sun Java platforms*
- *Extended transactions list for End-User-Experience*
- *Extended SLA Availability calculation method*
- *Improved Windows Events reporting*
