

Windows & .NET Magazine Name Hypersoft's Messaging Reporting Tool OmniAnalyser™ one of Tech Ed 2003 Best of Show Finalists

Munich, 21 May 2003. Windows & .NET Magazine names the messaging reporting and analysis tool OmniAnalyser™ from Hypersoft Informationssysteme GmbH one of the Tech Ed 2003 Best of Show finalists in the messaging category.

Hypersoft is one of 29 finalists for the Tech Ed Best of Show Awards conducted by the magazine. Winners will be determined and announced at Tech Ed 2003 in Dallas, Texas on June 4, where Hypersoft will present its newest releases of the OmniAnalyser™ and OmniContext™ Reporting Server software.

"The field included over 200 entries and the selection process was rigorous. We chose finalists based on the product's strategic importance to the market, its competitive advantages and the value to the customer," said Mike Otey, Senior Technical Editor for Windows & .NET Magazine.

The nomination proves once more the value and importance of OmniAnalyser™ to today's companies that want to save costs and extract most value out of their corporate e-mail system. This software is the only solution on the market today, which provides its comprehensible reporting capabilities across four platforms: Microsoft Exchange, Lotus Domino/Notes, iPlanet (Sun ONE Integration Server), and Sendmail.
